PROJECTS

- 1. Validation - 10 min.**
- 2. Pod Busters - 10 min.**
- 3. Repeatability - 20 min.**

**VALIDATION
PROJECT**

- **Compare 13 weeks forecast of 4 Food Network shows to actual audience numbers**
- **Validate predictions and understand errors**

Last Year

1. Graph actual P25-54 audience data
2. Use time series to seasonally adjust data
3. Develop trend line
4. Create seasonally adjusted forecast based on trend line

This year

5. Compare forecast to new actual audience data

**ACCURATE
MODEL**

OBJECTIVES

METHODOLOGY

RESULTS

CONCLUSION

Recommendations

- Remove outliers from the model
- Use data starting from where trend line changes
- Include more independent variables to the model

A top-down view of a wooden cutting board with a large, cooked piece of meat, possibly a brisket, in the center. The meat is dark brown and glistening. To the left of the meat, a slice of the same meat is being cut by a knife with a silver blade and a handle made of antler. A fork with a similar antler handle is also present, with its tines resting on the meat. The cutting board is set on a dark, textured wooden surface. The text 'POD BUSTERS PROJECT' is overlaid on the right side of the image in a bold, white, sans-serif font with a black outline.

**POD BUSTERS
PROJECT**

- **Understand the effect of pod busters on average commercial ratings**
- **Evaluate if Food Network should use pod busters**

1. Comparisons:

Episode n

1st commercial break
2nd commercial break
Pod Buster break
4th commercial break

VS

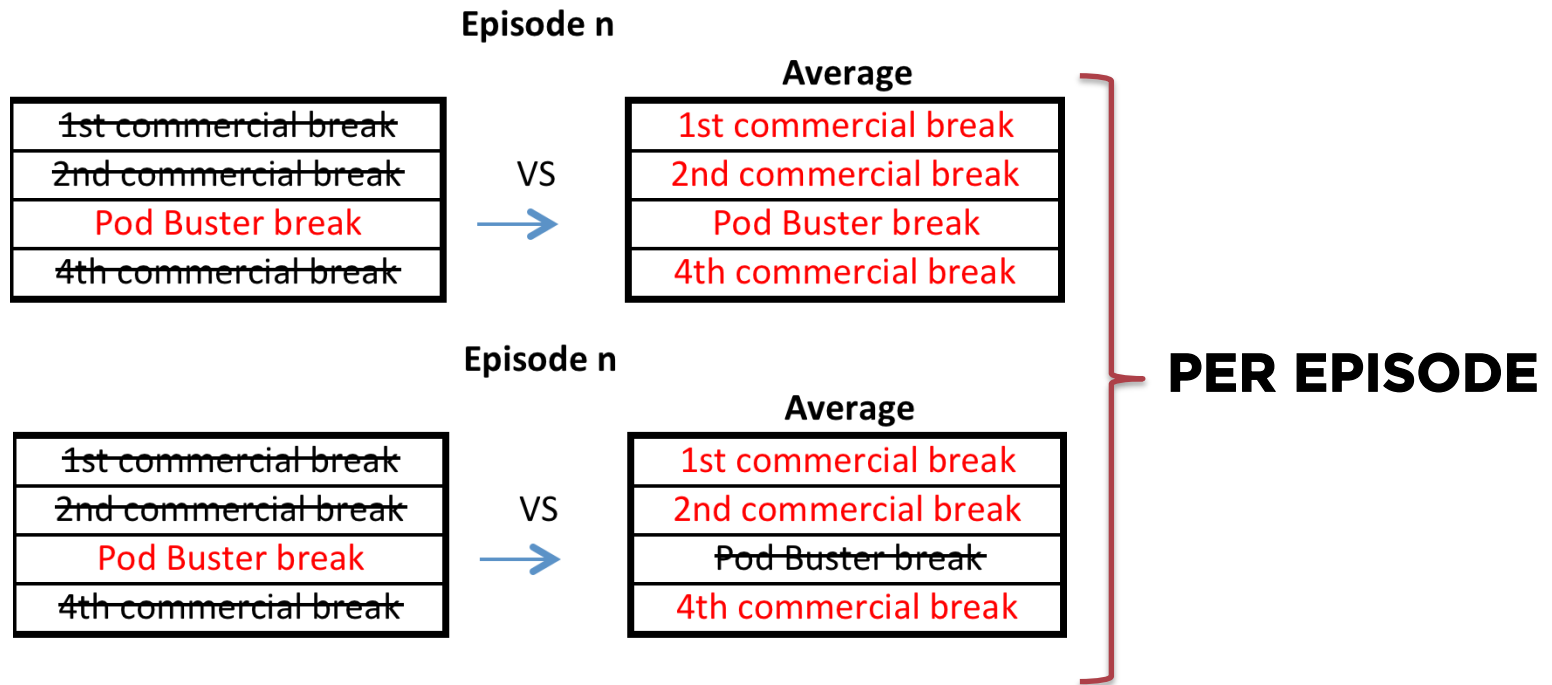

Average

1st commercial break
2nd commercial break
Pod Buster break
4th commercial break

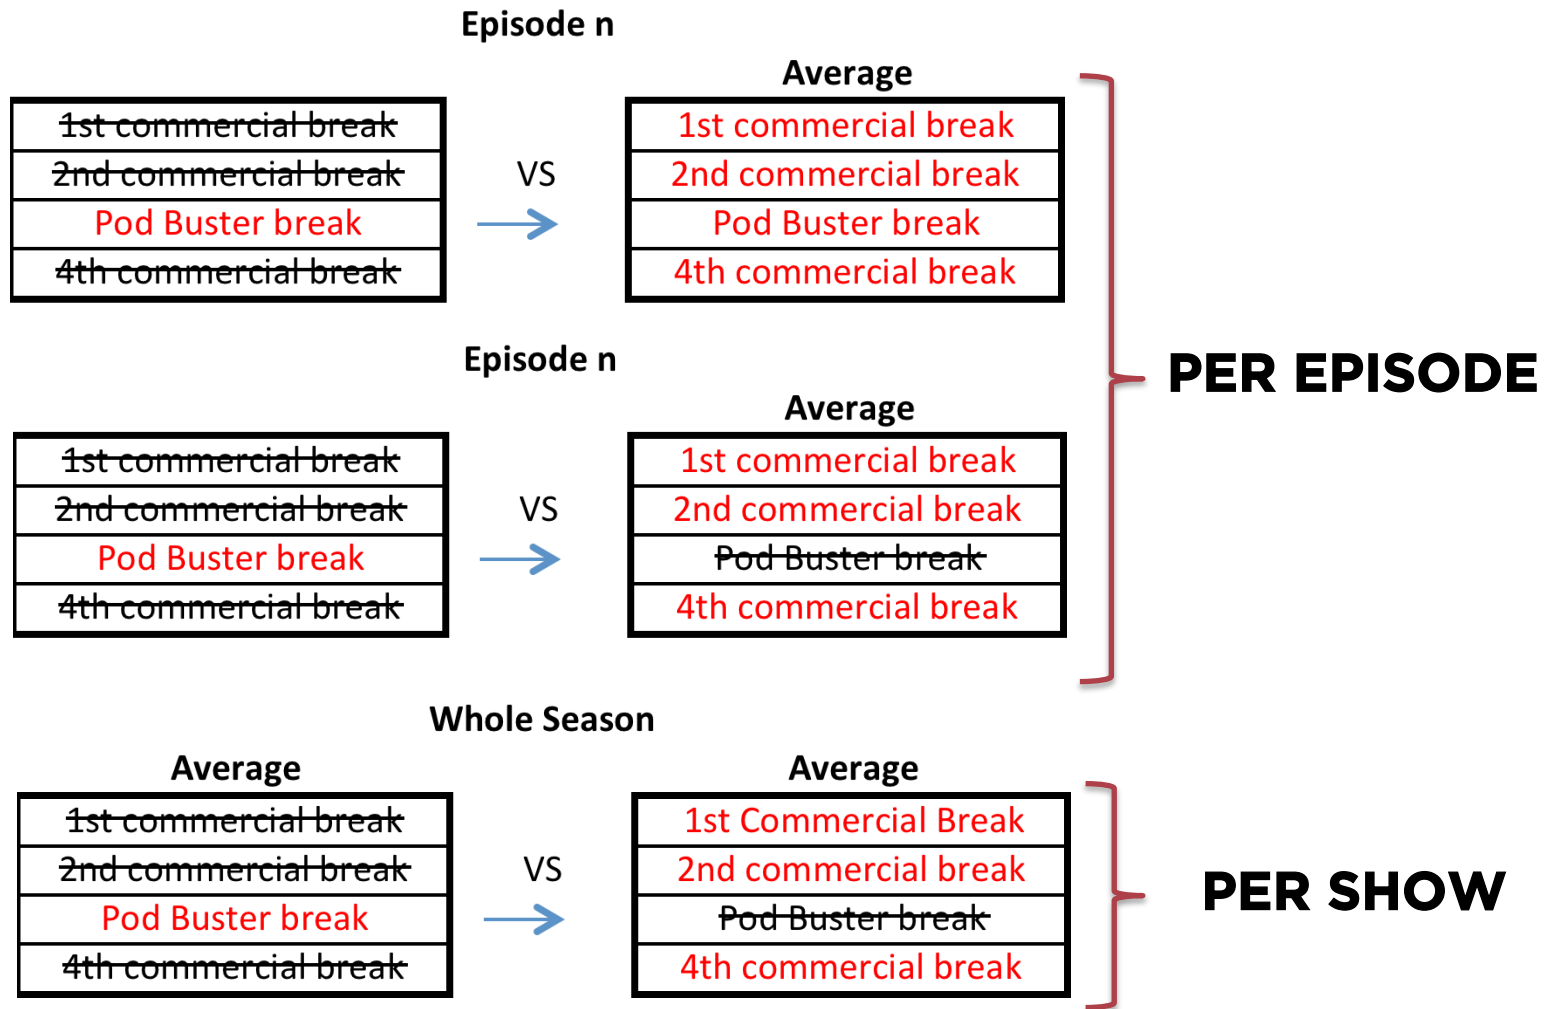

1. Comparisons:

Real Housewives

Married to Medicine 3rd Pods

OBJECTIVES

METHODOLOGY

RESULTS

CONCLUSION

Married to Medicine

Top Chef

Real Housewives

- Regular commercial break average rating: **0.4899**
- Pod Buster break average rating: **0.4800**

Out of 16 weeks, only 4 Pod Buster breaks outperformed the average for the same day

OBJECTIVES

METHODOLOGY

RESULTS

CONCLUSION

Married to Medicine

Top Chef

Real Housewives

Top Chef 3rd Pods

OBJECTIVES

METHODOLOGY

RESULTS

CONCLUSION

Married to Medicine

Top Chef

Real Housewives

- Regular commercial break average rating: **0.8665**
- Pod Buster break average rating: **0.8533**

Out of 19 weeks, only 4 Pod Buster breaks outperformed the average for the same day

OBJECTIVES

METHODOLOGY

RESULTS

CONCLUSION

Married to Medicine

Top Chef

Real Housewives

Real Housewives 3rd Pods

OBJECTIVES

METHODOLOGY

RESULTS

CONCLUSION

Pod Busters commercial breaks are not outperforming regular commercial breaks in terms of ratings

Possible explanation

- 7 minute pods are not outperforming 3 minute pods because of the longer duration
- Positive changes around the 4 minute mark could be due to viewers switching back thinking their show is back on

Further Testing

- Randomize where the pod buster is played

**REPEATABILITY
PROJECT**

- **Understand the effect that repeating a premiere on the same week has on overall audience**
- **Create models that explains audience numbers behavior on repeating shows**
- **Predict Food Network audience numbers with more showings of an episode per week**

1. Analyzed drops in audience numbers from premiere to repeat showings

8 Food Network shows:

- Chopped Canada
- Cutthroat Kitchen
- Food Court Wars
- Guy's Grocery Games
- Mystery Diners
- Restaurant Impossible
- Restaurant Stakeout
- Rewrapped

10 Competitor Networks:

- Bravo!
- Esquire
- FX
- HGTV
- History
- Lifetime
- Oxygen
- OWN
- Spike
- WE

OBJECTIVES

METHODOLOGY

RESULTS

CONCLUSION

2. Extracted all episodes from Competitor Networks that were shown 4 or 6 times a week
3. Developed 4-showing model and 6-showing model based on the average audience drops from relevant Competitor Networks
4. Applied to Food Network shows using premiere audience numbers
